

Extension Request for Tech Memo Deadline

Agenda Item 6.9.4

May 9, 2018

© 2014 HDR, all rights reserved.

September 10 Technical Memorandum

- Information to include:

- Population and Water Demands Reports
- Surface Water Availability Report
- Existing Water Supplies Report
- Identified Water Needs/Surpluses
- Source Water Balance Report
- Comparison of Availability, Supplies and Demands to the 2016 Brazos G Plan
- Documentation of modifications to “standard” hydrologic methods – WAM modifications, MAG Peak Factor, alternative yields, etc., and model input/output and processes used
- Documented process used to identify potentially feasible water management strategies
- List of identified potentially feasible water management strategies
- Declaration whether RWPG intends to pursue simplified planning

Requires data entry completed in DB22

September 10 Technical Memorandum

- Notice Requirements:
 - 14-day posting prior to RWPG adoption
 - Comments accepted for 14 days following meeting
 - Notice requirements are intended to increase awareness of intent to pursue simplified planning
 - Timing to submit by Sept 10
 - May/June – compile contractual and water supply information
 - May/June – water availability analyses
 - WAM analyses – supplies to run-of-river rights and reservoir yield analyses
 - **Groundwater allocations**
 - Allocate supplies to WUGs, WWPs
 - July – database entry, preparation of memorandum
 - July 30 – technical memorandum completed
 - August 6 – notice posted for meeting
 - August 20 – Brazos G meeting to approve technical memorandum
 - September 3 – last day to take public comment
 - September 10 – submit technical memorandum
- MAG Peak Factor process may delay GW allocations

Suggested Action:

The Brazos G Regional Water Planning Group authorizes the Brazos River Authority to request a revised deadline of November 5, 2018 to submit the Technical Memorandum, in order to complete the process for determining if a MAG Peak Factor will be used to determine available groundwater supplies in the 2021 Brazos G Regional Water Plan.
