**RE: March 22, 2005 Brazos G RWPG Meeting
Summary for Agenda Item 6.5 – Review of DRAFT Plans for Water User Groups (WUGs) and
Wholesale Water Providers (WWPs) to be Presented at Subregional Meetings**

During agenda Item 6.5, HDR and Freese and Nichols will present county-by-county summaries of DRAFT water management plans for Water User Groups (WUGs). This information was provided to the group for 18 counties at the February 22, 2005 Brazos G meeting. The remainder of the counties will be provided to the group at the March meeting.

This information will be presented at the three subregional meetings in April. In many cases, a recommended strategy has not been identified between alternative strategies for specific WUGs, and multiple potential strategies are included as alternatives. HDR intends to utilize comments obtained during the subregional meetings to guide the selection of recommended water management strategies.

Following presentation of the WUG plans, HDR will present assessments of supplies, demands and needs for Wholesale Water Providers. HDR will present DRAFT plans for each WWP. This information will also be presented at the subregional meetings in April.

At the time of this memorandum, costs have been updated for the majority of water management strategies, but are still being refined for several proposed water management strategies. Final cost estimates will be completed and presented at the subregional meetings.

The information will be presented for your information. No action is requested at this time.
