Re: Amendment of 2006 Regional G Water Plan

Dear Dr. Mack:

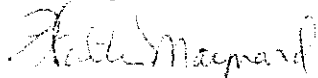

Luminant (formerly TXU) is in the process of preparing a Combined Construction and Operating License Application to be submitted to the Nuclear Regulatory Commission (NRC) for approval to construct and operate two additional nuclear-fueled electrical generating stations at its existing Comanche Peak Nuclear Power Plant. Comanche Peak is located near Glen Rose, Texas in Hood and Somervell Counties. Applications will also be submitted to the Texas Commission on Environmental Quality (TCEQ) to obtain the required permits.

Luminant presently has existing water contracts with the Brazos River Authority (BRA) that will provide a portion of the water required for the proposed two new units. However, additional water will be required, and Luminant is presently in discussions with BRA.

It is my understanding that the 2006 Region G Water Plan does not have these additional steam-electric demands accounted for in the plan, nor sufficient water allocated to meet these needs. It is requested that the Region G Water Planning Group consider amending the 2006 plan to address these anticipated needs and the source of supply to meet them. I and representatives of Luminant will be happy to attend the next Regional Planning meeting, scheduled for October 24, 2007, and provide additional information and answer any questions.

Thank-you for your cooperation in this matter, and should the Regional Planning Group or its consultants need additional information, please contact the under-signed at 254-897-2322 or Luminant's representative Mr. Mike Blevins, Senior Vice President and Chief Nuclear Officer at 254-897-5209.

Sincerely,

Walter Maynard
Somervell County Judge
