

Trey & Gail ---

In talking with our Commissioners, County Engineer, and Mayor Merle Stalcup of the Village of Salado, we think you may want to study the upper portion of Salado Creek as an addition as candidate as a unique stream segment. It has many of the factors used in the determination. Currently, the Leon River and Little River are identified as candidates as unique stream segments. Mayor Stalcup's email is mstalcup@vvm.com. His phone is 760-9432. --- We do not believe we have any further sites uniquely suited for reservoir construction. The potential for increasing the capacity of Lakes Belton and Stillhouse is something that is often mentioned, however. --- Thanks. --- Jon
