RE: ARRA/TWDB #61800/City of Iredell
Request for Consistency Waiver

Dear Mr. Buzbee:

The City of Iredell is planning to drill a new well to replace two no longer practically usable wells using ARRA funds.

As part of the application process the TWDB is requiring a Consistency Waiver for the endeavor. The City currently has a single source of water for its public water system and is out of compliance with the TCEQ 85% service rule. In order to address this deficiency a well is to be drilled to the Second Trinity. Production of around 120 GPM is anticipated.

We are by this letter requesting that this matter be placed on the next meeting agenda of the Brazos 6 Planning Committee in order that a City representative may attend and present the request in person.

Thanks for your help.

Sincerely,

Charles P. Gillespie Jr. P.E.

Charles P. Gillespie, Jr., P.E.
